Jobs/Recruiting:
- GSK has a position for a BIOPHARMACEUTICAL PROCESS TECHNOLOGIST in the area of PROTEIN/ANTIBODY FORMULATION AND DELIVERY.
  
  **BASIC QUALIFICATIONS:** Masters in Pharmaceutical Sciences, Chemistry, Chemical/Biochemical Engineering or equivalent with 2-4 years of experience or PhD/PharmD with 0-3 years. Experience in pre-clinical drug development or biopharmaceutical manufacturing in a technical role. Strong scientific knowledge appropriate to the specific area of Protein/Antibody Formulation and Delivery. Strong knowledge of protein structure, stability and methods of protein analysis. Passionate personality and positive attitude. Excellent written and oral communication skills. Ability to work on multiple tasks/technologies at a given time with strict attention to detail. Strong ability to build relationships and seek collaboration with scientists in other functional areas. Demonstrated effective interpersonal, communication, and negotiation skills across internal and external stakeholders Influential, yet challenging. Logical and independent thinking. Requires little direction to conduct day to day operations. For more information, please contact Patrick Pohlhaus at patrick.d.pohlhaus@gsk.com.

Available positions can be found on the Chemical & Biomolecular Engineering opportunity website (http://www.che.udel.edu/biz/OppIndex.html), so be sure to check it regularly.
